EDUCATION

Master of Technology | Computer Science

Indian Institute of Technology Madras (India's Top Engineering Institute)

2017 – 2019

Chennai, Tamil Nadu

WORK EXPERIENCE

Applications Engineer

Rakuten

July 2023 – Present

Tokyo, Japan

– Browsing History, Gift History and Bookmark

Java SpringBoot Python K8s Kafka Jenkins Javascript React AI Oracle Couchbase Redis Apache

- * AI Integration in Production
- * Modernize Services with **traffic of 34,000 Requests Per Second**
- * **Database Migration:** zero-downtime, rollback-safe from Couchbase (NoSQL) to Oracle (SQL)
- * **Frontend migration:** to react-based storefront for Rakuten's *ashiato.rakuten.co.jp*
- * Bare-metal to Cloud
- * Jenkins with K8s deployments and real-time configuration updates
- * Built observability and alerting systems
- * Security Upgrades and vulnerability fixes for critical services
- * Large-scale **load/stress tests** for Rakuten Super Sale Event

– Coupon Platform Engineering

LoadBalancers GSLBs AWS Ingress Gateways VIP Istio Envoy

- * Software Modernization: PHP 5 to PHP 8, with Symfony framework
- * Infrastructure migration to Hybrid Cloud Platform

Senior Software Engineer

Myntra (Walmart)

July 2019 – July 2023

Bengaluru, Karnataka, India

– Messaging Platform Engineering

Java Python Go JavaScript React

- * Architected and maintained enterprise-scale messaging infrastructure **60K Requests Per Second** with 100% uptime
- * Developed and maintained multi-language SDKs
- * Designed cross-datacenter topic replication system with self-service capabilities

– Secured Kafka System

Kafka Security Encryption

- * Built System to handles Sensitive Data in Kafka Topics
- * Kafka Custom SDKs to handle PII data

– MFB PLM System

Java Spring Boot MySQL

- * Development of high-performance PLM system (100K RPM)
- * Implemented proprietary alternative to PRM360
- * Enterprise-grade solution to Fast Fashion PLM System

– KnowYourClient System

REST API Security Access Control

- * Architected real-time API protection and client metadata management system

- * Implemented non-intrusive access control layer processing 250K monthly requests
- * Developed dynamic API security without requiring existing service modifications
- **MFB-PLM Excel Plugin**
 - C# Excel Automation
 - * Independently developed and deployed C# Excel plugin for streamlined PLM operations
 - * Automated spreadsheet validation and data upload
- **Observability and Monitoring**
 - ELK Stack Prometheus Grafana InfluxDB
 - * Integration with Logging infrastructure utilizing ELK stack
 - * Integration of StatsD, InfluxDB, Prometheus, and Grafana
 - * Mission-critical monitoring with email and Slack notifications
- **Scheduler Lock**
 - Concurrency Distributed Systems
 - * Database-driven scheduling synchronization system
 - * Enhanced system reliability through optimized concurrent process management
- **Containerization & DevOps**
 - Docker MySQL 8 Load Testing
 - * Dockerization of critical services for consistent deployment and scalability
 - * Performing Rigorous load tests (stress testing) on Kafka Brokers before any critical events.
 - * Database Migration from MySQL5.7 to MySQL 8 across all services within the team

SKILLS

Technologies:

- Python, Java, JavaScript, Rust, C#, C/C++, Go, TypeScript, PHP
- Actix Web, SpringBoot, FastAPI, Symfony
- ReactJS, Node.js, Nginx, Apache HTTP Server
- Kafka, RabbitMQ, Redis, SockJS, Ansible
- Grafana, Prometheus, StatsD, InfluxDB
- Hurl, Behat, JUnit, Mockito
- Gatling, k6
- MySQL, MongoDB, Couchbase, Oracle
- Docker, Jenkins, Kubernetes, GitHub Actions
- Microsoft Azure, Amazon Web Services, Rakuten One Cloud
- MATLAB, TensorFlow, Mathematica

PROJECTS AND RESEARCH

Nutritional Information Analysis - Indian Cuisines

Deep Learning Convolutional Neural Networks Data Engineering

- Developed machine learning model for automated nutritional content assessment
- Engineered comprehensive training dataset for Indian culinary analysis
- Implemented algorithmic estimation of nutritional values with high accuracy

Robotics Engineering

Robotics Algorithms

- Designed and implemented autonomous navigation systems
- Constructed and programmed 4-wheeled robot utilizing Lego NXT architecture

- Developed control algorithms for precise movement and obstacle avoidance

Academic Research Projects

SPARQL Java APIs

- Implemented semantic web queries using SPARQL and RDF frameworks
- Developed Bayesian classification system for email filtering
- Integrated Gmail API with Java-based spam detection algorithm
